HIGH TEMPERATURE GREASE SPRAY FOR OVEN RACKS

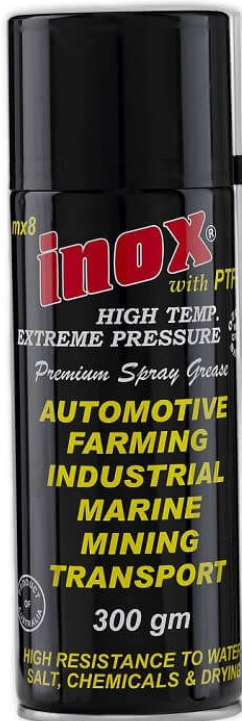

Everyone that works in a bakery, knows how annoying it is when the oven racks and trolley doesn't move.

When the racks are hard to move and manoeuvre, you are not only losing time and money, you are also facing a potential WHS claim.

Do you know that a simple spray with high temperature grease can keep your castors running like when they were new ?

Bakewise has explored and “long time tested” several options, and we are now confident that we have the best and most efficient solution for bakery oven racks !

INOX MX8 is a High Temperature Extreme Pressure Grease that comes in a 300 g aerosol

- Comes with a standard spray nozzle.
- INOX-MX8 has excellent resistance to water and water wash out even at elevated temperatures.
- PTFE – Polytetrafluoroethylene is a premium grade anti-friction medium which gives increased lubrication and reduces operating temperatures to bearings, bushes, shafts, gears, chains, splines, PTO's, turntables, cables, universals, CV and ball joint.
- Effective lubrication is maintained and in these situations, it also gives protection against rusting and corrosion
- The extreme pressure and anti-wear properties of INOX MX8 grease gives long service life under high loading and shock loading conditions from very low to very high temperature environments
- **AVAILABLE ON THE WEBSHOP AT WWW.BAKEWISE.COM.AU**
